Executive Summary / Conclusions

Identification

Product Name & Version/Build:	LIMS Iteration One
Test Procedure Id:	1
Test Procedure:	Overall system UI and functionality test
Execution Completed Date:	March 11,2026

Conclusions

Initial testing of LIMS was conducted on March 11, 2026. The developer Farhan conducted 14 tests designed to test the overall operation of LIMS Iteration One.

Upon completion of 14 test cases, we have discovered 1 unknown issue that will require resolution. This issue is related to book availability logic and is considered high concern for data integrity. The team will strive to resolve this issue prior to final deployment.

Summary of Test Results

Table A: Test Execution Summary

Test Case #	Description	Results
1	Staff Login (Valid)	Pass
2	Staff Login (Invalid)	Pass
3	Access Admin Feature as Staff	Pass
4	Add New Book (Valid)	Pass
5	Add New Book (Empty Fields)	Pass
6	Edit Book Details	Pass
7	Supplier Smart Deletion (Referential Integrity)	Pass
8	Delete Book (Linked to Loan)	Pass
9	Register New Client	Pass
10	Generate Overdue Books Report (Date Logic)	Pass
11	Checkout Book (Valid)	Pass
12	Checkout Unavailable Book	Fail
13	Mark Book Returned	Pass
14	Session Inactivity Timeout	Pass

Table B: Test Failure Notes

Test Case #	Comments
12	Failed; critical impact on inventory accuracy. System allows duplicate active loans.

Evaluation

Initial testing of LIMS Iteration One was a success, with 92.8% of tests undertaken being passed. The remaining test that failed has a critical impact on the system's ability to track physical inventory accurately but can be resolved through

controller-level logic updates. The team is confident that this issue can be resolved easily.

Summary of Activities

Testing involved manual entry across all CRUD modules including Catalog, Client Management, and Loan Tracking. Negative testing was also performed on security and validation constraints.

Resource Report

Hours required for preparation, setup, and configuration issues	2.5
Hours required to execute manual testing	1.5
Hours required to execute automated testing	N/A
Estimate of hours required to re-execute Test Procedure in full	2 hours
Comments regarding updates and changes to Test Procedure	Should include testing for multi-copy book management.
Comments regarding potential test automation	Consider implementing unit testing for Model logic.
Additional Comments	N/A
